DETAILED ACTION

This action is in response to papers filed on March 15, 2007.

Claims 1-62 are allowed.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:
2. Claims 1, 39 and 51 teach a system, method and apparatus for implementing a recording plan based on the presence of a client.
3. The claims teach client monitor that generate a presence message for one of a plurality of processing units that identifies the presence of a client on a network. The presence message includes both a client identification and presence type. Once the plan manager receives the presence message the plan manager retrieves a plan template. The plan template is retrieved based on the identity and the presence type of the client. Once the plan template is retrieve a recording plan is created. The recording plan is created based on they presence type and client identification.
4. The remaining dependent claims 2-38, 40-50 and 52-62 are considered allowable, as they are dependent and based off of an allowable independent claim.
5. The prior at does not teach or suggest the limitations of a presence message that identifies both the client ID and the presence type of the client of which a plan template and recording plan are then based off of the specific client ID and presence type.
6. **US Patent Publication 20020071529 A1 "Method and System for Multi-media Networking Based on Data Acquisition, recording and Distribution; Nelkenbaum.**
7. Nelkenbaum teaches a system, method and apparatus for an intelligent recording system that can be distributed to record calls at a predetermined schedule. Nelkenbaum's predetermined recording fails to teach receiving a presence message containing a
